Wrought Iron Machines

TRANSFORM YOUR BUSINESS

Fabricate Your Own Architectural Components

HERE IS HOW YOUR BUSINESS WILL BENEFIT.

- **Own the same machinery** world wide parts suppliers use.
- **Labor cost go down**, as your least expensive employees become the most productive.
- **Manufacture unique ironwork** that is not cost effective to produce any other way.
- **Speed up turn around on jobs** - no waiting for parts or shipping. Reduce inventory.
- **Yes, you can afford it!** Less than the cost of one \$10/hr employee with a useful life of over 25 years. It will make you money for decades even after it is paid for.
- **Tax Shelter** (ask your CPA about the tax benefits of purchasing equipment).
- **No payroll**, overtime, workers comp, sick days, bad attitude...

HPG2B - Embossing Unit

- Hammered and textured bar up to 1" x 1"
- Flat Bar Embossing up to 2" wide
- Hammered tube up to 2" x 2"

Hebö invented the modern wrought iron machine and is the worldwide leader in this field. The multi-functional Hebö system can: Twist, endforge, scroll, emboss, texture, hammer tube, and press belly pickets. The Hebö is designed and built by German blacksmiths for the ornamental iron industry. **The Hebö system will bring new levels of production and creativity to the Ornamental Iron Fabricator.**

VDZ30 - Basket Making Attachment

STM5 - motor unit with SPS2 computer controller and variable speed control

- Twisting Capacity: 1.25" X 1.25"
- Twisting Length: 48"

SSB3 - scroll bending unit with SPS2 computer and variable speed control

- Capacity Possible:
- Square 3/4" X 3/4"
 - Flat 1/2" x 2"

WZT24 - hydraulic unit with SPS2 computer. 24 Ton Cylinder
